EXECUTIVE BIOGRAPHY

Pooja is a seasoned IT professional with experience of nearly a decade and has deep knowledge of developing detailed audit execution plans, cloud delivery models, IT system general controls, systems/applications development, change management, logical access security, security technologies, contingency, and recovery, among others.

A Certified Information System Auditor (CISA) and Chartered Accountant (CA) by qualification, Pooja believes in fostering a positive work environment by soliciting feedback from colleagues and developing the skills of staff auditors. She has the ability to work with multiple teams and personnel on different projects simultaneously and deliver the best within the deadlines.

Pooja has performed several cross-functional roles such as Information Risk Management, ISO 27001 Standard Implementations, Data Privacy and Protection, Application Audits, Internal Audits, Risk & Control Implementations, Application Security Audit, Operating System Security Audit, ISMS Internal Audits, Handling MIS for Information Security Department, Applications User Access Management through SAM, Information System Audit, etc.

Pooja has been associated with global MSSP Infopercept Consulting as an information security consultant for two years. Prior to that, she worked as a senior executive for IT-Governance, Risk, and Compliance at AGC Networks and as an audit consultant at Crystal Solutions.
